

the historical attempt by man
to convert his evolution from
a subjective to an objective process.

christmas 1948

the systematic growth
of man's intellectually augmented evolution
is structured within
a progressively improved
scaffolding of assumptions.
the integrity of the principle
of intellectual assumptions
as bravely taken within the confines
of residual facts of disillusioned experience
is progressively persuasive.
for the new prospect of magnificent reality
looms into ken
as the retrospective lure of abandoned illusion
first dwarfs then dissolves.
thereafter the temporary scaffolding
advantaged by informed approximation
of symplifying and interacting principles
is formally replaced by earned controls
consisting of ever more exact degrees
of measurement
of the infinitely interactive system
of unique principles
of energetic relationship
of universe,-
its inherent proclivities and articulations,--
that is, its natural behavior.
the newly swollen growth
of total interaction of discovered,
equated, and valved-in principles
floods silently to contain
the subconscious rational of the
total individual -- -- society.
consciously, society is at first fascinated
by the novelties in technical manifestation

of the omnidirectional advance
as comparised only to the residual plurality
of fading traditional background illusions.
wherefor:
ultimate social awareness
of total engulfment
by new orientation
to comprehensive principles of reality
appears first as enormous apprehension
of potential loss -- -- --
of what ?
of things, of vanities ,-
of self proclaimed prestige ?
of the illusiory values and
transitory standards and prerogatives
appropriate only to adjustments completed
in yesterdays diminutive gains ,
by exceptional self?
---- ---- ---- ----
when man shall become preoccupied
with drawing off the progressive magnitudes
of new potential
to establish constant world wide
advancement of living standards,
specifically: through the systematic incorporation
of scientific knowledge and technical advantage
in an earth embracing service industry
of autonomous dwelling and intelligence
facility and felicity
insuring not only his progressive immunity
to annihilative factors of nature
but cohering his progressive appetite for truth
then will subside
the subjective requirements,-

the negative motivations,
the antipathetic surges,
the concessions to survival-mandated compromise
promulgating the theory of
advancement by political initiative
whose expedient ways
are progressively powered by the
accumulating science and technology potential
to be tapped only for dubious war objectives
it will take many waves
of threatened self destruction
by society
to convince and instruct and
mobilize
an effectively articulate majority
of humanity
in the synchronization of society
towards an objective
evolutionary volition
inspired by deeply acknowledged faith
in an omniscient wisdom and benevolence
instructing through intellect -- -- --
(intellect wrote $e=mc^2$,--
energy did not inscribe intellect $e = mc^2$)
intellect may write every
equation of physical behavior,
but no physical or abstract
equation will ever compass
intellect or its self starter secret.
---- ---- ---- ----
when the objective evolution
emerges the intellectually
architected house-of-tomorrow
will be central to the emergence.
